REMARKS

25X1X

25X1B 1. On 12 June 1951, three jet aircraft were parked in the northwestern corner of Brandis airfield. * There was no flying between 11 a.m. and 5 p.m. although the weather was good. German women were harvesting hay on the landing field. Driving school trucks were seen in the vicinity of the field. moved toward the barracks buildings at the field. 25X1B

2. An individual radio mast with several guy wires at its top, midpoint, and lower third portion was located on the southern edge of the field. A wire led from the masthead to a nearby wooden hut. The noise of a running engine was heard from the hut. A radio installation with four masts, each about 10 to 11 meters high, was about 100 meters northeast of the radio mast. ** In the middle of the square of four masts there was a tent which had a rod antenna about 6 meters high on its roof. Each mast had a cable at its midpoint where guy wires were also fitted. The four cables led into four openings in the tent. A Soviet soldier was working on a heavy cable which connected the radio installation with four masts and the radio installation with one mast.

25X1A

* Comment. The airfield is occupied by a fighter regiment equipped with at least 25 MIG-15s. Most of the aircraft are parked in the hangars when there is no flying activity.

** Comment. This installation is an Adcock DF station.
